Company summary

Austrans provide high quality waste solutions across many industry sectors

Austrans are an established Australian Company, privately owned and family operated. With proven reliability and experience, Austrans has successfully become the leaders in the Waste Industry.

Austrans provide high quality waste solutions across many industry sectors from energy and mining, shipping, hospitality and construction. Experts in waste collection services, industrial cleaning (tanks, sewers, drains, vats, boilers, grease traps), waste storage, civil services and farming feed transportation services.

With a waste collection fleet of 30 vehicles, offices and depots in Esk, Brisbane, Moranbah and Miles, Austrans offer waste solutions Australia wide. Austrans is experienced in all facets of Waste Transport Solutions, incorporating a 24 hour a day service for both industrial and commercial customers. Austrans are EPA approved, enabling the safe handling and disposal of all waste requirements.

Austrans' mission

Austrans is committed to developing sustainable solutions for both their clients and the environment

Capability statement

Austrans has the capability and established operational experience to supply an exceptionally high level of service and commitment, delivering waste solutions Australia wide.

Austrans' services

- Bulk Liquid Waste
- Industrial Services
- Onsite Waste Solutions
- General and Hazardous Waste
- Civil Services

We have used Austrans for a number of years now and have always been happy with the level of service. Quite often we have to transport wastewater at short notice and as most of our work involves entry to Military Bases we require extra information from our Contractors so they can gain access to the Base. The team at Austrans always does their best to meet our needs.

Greg Keogh, Operations Director,
AdTech Environmental Pty Ltd.

Waste specialists

Bulk liquid waste

Austrans offers complete solutions for the collection and disposal of bulk liquid wastes, utilising specialist equipment and technology.

Austrans specialize in:

- Oily water
- Septic
- Sewage
- Oil
- Dirty water
- PCB oil
- Storm water
- Leachate water
- Coolant
- Caustic
- Biomass
- Dynamotious earth
- Lime water
- Concrete slurry
- Wash water
- Marine mud
- Driller mud
- Bentonite
- Formaldehyde
- Resins
- Bilge water
- Salt water
- Manure
- Brewery waste
- Sludge
- Slurry
- Cement powder
- Coal dust
- Mud
- Molasses
- Fly ash
- Oily sludge
- Recycled water
- Potable water
- Filter cake

Austrans are fully equipped

With fully equipped mini super suckers, semi vacuum tankers, medium super suckers and large super suckers, Austrans has the capacity to remove large quantities of various forms of waste, from liquids to solids. Austrans can provide the complete waste service that is required from removal, transport and disposal.

Vacuum Tankers These units will vacuum load as well as unload using pressure to blow the load out, this is a useful ability when you would like to put liquid into a storage tank. The Semi Trailer Vacuum Tankers range from 25,000L to 30,000L capacity and the B-Double Vacuum Tanker has a total capacity of 45,000L.

Super Suckers These units are a much more powerful vacuum unit, they have a tank with an opening rear door to be able to tip out liquid and solid products. The smaller rigid holds 7000L and 1000L of water, the larger 8 Wheeler holds 8,500L and 4000L of water. Both units are fitted with High Pressure Water Blasting and Excavation equipment. Both the Large Super Sucker and the King Vac are very powerful units using 6" hose and has the ability to vac up to depths of 200m (depending on the material). The King Vac has capacity tank size of 11,000L, used for wet and dry products, with a pump size of 6500cfm, this is an extremely quiet and efficient example of machinery.

Austrans can deliver what you need for your job

Onsite waste storage

Austrans services include oily water / sludge separator servicing and maintenance, bulk onsite waste storage facilities of various capacities.

Austrans can manage a range of collection systems to cater for different volume, site, waste and frequency requirements.

Austrans can:

- Manage bulk bins for large and voluminous quantities of waste from commercial or industrial customers
- Manage and supply of waste services for minor or major events
- Manage recycling solutions for the range of collection systems

General and hazardous waste

Austrans services include asbestos, dangerous goods, clinical waste, event services, soil and site remediation and emergency spill response.

Industrial services

Civil services

Services include:

- Grease traps
- High pressure water jetting
- Confined Space entry
- Non destructive digging
- Vacuum loading
- Sewer & drain cleaning

Austrans has specialised equipment for drain cleaning, pit cleaning, water blasting, factory shutdowns, super vacs (wet and dry).

High pressure water blasting

With specially designed vehicles, Austrans can provide high powered water blasting to clean tanks, boilers, vats and most surfaces to allow the client to continue utilizing their important facilities. The 6000L Gully Sucker with a tipping barrel and opening rear door also holds 2000L of water to supply its own water blaster.

Cleaning and clearing drains and pipes

Cleaning and clearing drains and pipes is one of the things Austrans does best, after dislodging blockages, the waste is then vacuumed up by the truck and disposed of at an approved Waste facility. Austrans truck has the capability of cleaning and clearing drains and pipes from 50mm to 1200mm.

Water or liquid stock feed transport

Bulk Liquid Transport is one of Austrans specialities, with high powered Semi Vacuum Tankers this enables Austrans to relocate large volumes of liquid economically, quickly and efficiently. Austrans has highly trained drivers with a very high level of experience, who are equipped with modern vehicles to load, transport and unload safely, cost effectively and professionally.

Tank unloading and cleaning

Liquid Storage and Settling Tanks – Austrans has a large range of tank sizes that are available for hire for sites, these convenient storage facilities are specifically designed to be emptied periodically and are very economical.

To keep transport simple and cost effective, all Austrans tanks can be easily moved by Tilt Tray. Hire schedules can be adjusted to suit your needs and rates can be charged per day, or for long-term arrangements, a per month charge may be better suited for your needs.

Austrans has over 20 years experience

Austrans has over 20 years experience in the earth moving industry and has a fleet of civil machinery including Gravel screen.

With Austrans large range of heavy earthmoving equipment, they can provide the equipment you need. From bobcats, excavators for small onsite jobs, to large scale subdivisions and civil works, Austrans machines and earthmoving team are well equipped to perform your project.
