

WASTE PROJECTS CIVIL

AUSTRANS
THE AUSTRANS GROUP^{PLD}

Austrans is committed to developing sustainable solutions for both their clients and the environment

RESPOND • REMOVE • RECYCLE • REHABILITATE

Our specialities

We specialise in supplying Abattoirs, Feedlots and Hide Plants with the following services:

Effluent Waste

Austrans effective transport and disposal of brine water and other hide related waste streams keep your operating costs at a minimum. The fleet of trucks operate 24 hours and can process small or large volumes of waste.

Industrial Cleaning

The Austrans Industrial services team is highly trained to specialise in tank cleaning, with high pressure water systems equipment, breathing apparatus and confined space qualifications. Austrans holds customer service as the top priority, all staff are well trained to work safely and productively.

Waste Transport

Removal of spoilt silage, boiler ash or other related solid wastes is something Austrans has the right equipment on hand to do efficiently. Austrans large fleet of specialised waste vehicles transport paunch, sludge, DAFF, fly ash and waste water. Large volumes can be bulked out quickly with B double vacuum tankers.

Pond Cleaning

With a great deal of experience in pond cleaning, Austrans stands apart from its competitors with its ability to remove large volumes of pond material using both waste and earthmoving equipment. Specialised waste licenses mean that Austrans can dispose of contaminated material legally and within all statutory environmental guidelines.

Feedlot Earthworks/Pen Cleaning

From many years of experience in the construction of cattle pens, manure cartage, extensions to pen operations, dust suppression and roadworks, Austrans knows how to get in and complete the job.
